jon lee
digital artist, drummer, computer game connoisseur
and theosophy geek

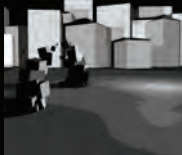

I am interested in attempting to manifest music in visual
forms - currently directly using a MIDI drumkit to drive
animations live in processing

linking the visual and conceptual digital world to my
musical interests is central to all aspects of my work

basia stramska, chnoor ziaei

the ba(hons) digital arts course validated by thames
valley university has been running since 2002

covering web design, games design, 3d modelling
and animation, 2d animation, video, special effects,
creative code and motion graphics, students from the
course are working across a range of related creative
industries; from photographic studios to the games
industry, from web design to tv production, from
illustration to teaching

the course thrives on small groups with intensive
theoretical, conceptual and skills based teaching from
experienced staff in excellently equipped facilities with
current software and hardware

the graduates of 2010 continue the development of
the course with video, 3d modelling, creative coding
and motion graphics proving particularly rich areas
this year, but overall the course continues to produce
highly skilled and sophisticated digital artist/designers
with a wide set of interests that reflects the current
industry preference for multi skilled practitioners

photoshop, illustrator, flash, indesign, coda, unity,
processing, arduino, cinema 4d, after effects, pthoe,
final cut, dreamweaver, freeway, cubic converter,
stitcher, wordpress
